DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The quotation marks in claim 4, lines 14, 17 and 19 should not be used because it may create confusion whether the limitations within the quotation marks are part of the claimed invention.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. Claims 1-5 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

The present application relates to an optical mouse and a method for preventing an erroneous operation thereof. The optical mouse comprises an image sensor, consisted of a plurality of pixels, for outputting signals accumulated in a given time as a pixel unit, an A/D converter, an image data calculating a moving value of the optical mouse, a system controller for controlling a data flow with an external system, an average value calculator calculating an average value, and a pick-up state discriminator

lamp state discriminator for discriminating whether the optical mouse is in a fluorescent lamp state and generating a fluorescent lamp state signal. The prior art of record does not teach or suggest these limitations as are claimed in claims 1 and 4.
